Hello Everyone!

In the first half of 2020, we have made significant strides to significantly healthcare enterprises through our cohorts. SAMSEN: Starting the last quarter, we supported eight healthcare enterprises during our cross ranging from healthcare technology to pharmacy services. Subsequently since the inception SEN healthcare enterprises have supported under the SAMSEN cohort.

Given the success of SAMSEN in Delta, we are excited to announce that we recently launched a partnership with Africa Health Business (AHB) to expand SAMSEN Blended Finance Facility to Nigeria. This partnership will further support the development in the healthcare sector, range response and ensure responsible COVID-19 funds as a result of the pandemic. Through this partnership, we will be able to support more healthcare enterprises scaled and attract 1,000 jobs(s) aimed at income improvements. This project marks a big leaving for the SAMSEN project as we look to start and deepening our implementation in Nigeria.

At SAMSEN, we understand that efforts to strengthening the healthcare sector must also promote environmental health and related factors to ensure sustainable outcomes. Thus, we are also working to integrate environmental health considerations in our healthcare business interventions, enabling us to better quantify services in an inclusive manner to underserved communities.

As a final-of-its-kind partnership, SAMSEN and the BIC Foundation have also launched a partnership to support the employment in the healthcare sector range response amid and responsibility COVID funds as a result of the pandemic. Through this partnership, we will be able to support more healthcare enterprises scaled, focused and attract 1,000 jobs(s) aimed at income improvements. This project marks a big leaving for the SAMSEN project as we look to start and deepening our implementation in Nigeria.

At SAMSEN, we understand that efforts to strengthening the healthcare sector must also promote environmental health and related factors to ensure sustainable outcomes. Thus, we are also working to integrate environmental health considerations in our healthcare business interventions, enabling us to better quantify services in an inclusive manner to underserved communities.

We proudly align with our commitment with the vision of our founder, Dr. Olatunde Odeku, to ensure SAMSEN is a non-exploitative fair tool to scale healthcare enterprises in Africa. Through SAMSEN, we are committed to leveraging innovation, technology & advancing universal healthcare participants by matching cost and service ease. SAMSEN has been playing a key role in the COVID-19 response in Nigeria and Ghana, and we are committed to continuously support healthcare enterprises to deliver quality services in an inclusive manner to underserved communities.

As a final-of-its-kind partnership, SAMSEN and the BIC Foundation have also launched a partnership to support the employment in the healthcare sector range response amid and responsibility COVID funds as a result of the pandemic. Through this partnership, we will be able to support more healthcare enterprises scaled, focused and attract 1,000 jobs(s) aimed at income improvements. Strengthening Healthcare Systems in Africa through Blended Finance

On April 2, 2020, SAMSEN kicked-start its COVID response by launching a Blended Finance Facility. The facility was partnered with Africa Health Business (AHB) to provide health-focused collaboration for addressing pressure health-care challenges in Delta and Lagos.

The driver was donated by the Health Tech Provider, Access Health International (AHI). The facility was created to which included two lightweight ventilators, personal protective equipment, telemedicine, development projects, private sector opportunities, and non-governmental and development organizations.

A report on the Market Assessment of Blended Finance Architecture (BFA) Finance was launched. The report which was developed by Health Finance Institute, highlights the Blended Finance Access, Global Health Investment Fund, and Investment Management and strategy solution.

The Blended Finance Facility will be SAFE Fund, as well as a Blended Finance facility for East Africa, provide cross-border knowledge and technology transfer and encourage partnerships for essential investments and innovations in the healthcare sector. The Blended Finance showed the expansion of how Blended finance instruments have helped them scale and expand to new geographies.

The event included significant discussions on sharing knowledge on how SAMSEN has been working through healthcare enterprises and promoting cross-border knowledge exchange and collaborations.
